

# Environmental Policy

---

To comply with the environmental laws, rules and guidelines to which the Company is liable to.

To set up an emergency intervention plan in order to reduce the environment impacts of unexpected events.

To reduce the impacts on the environment to the minimum by executing necessary studies.

Restore the mining sites in compliance to the restoration plans previously established during and after the exploitation.

Minimize the environmental impacts of our activities by applying the correct practices in using water, energy, transportation and supply usage.

Minimize the amount of waste, assuring a safe conduct of disposing it in an appropriate manner and managing it correctly.

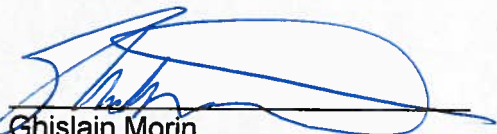

To have competent personnel to plan and manage the necessary environmental programs.

To assure that the employees and the contractors respect the present environmental policies, as well as the procedures established by the Company, in order to apply the principle long-term development of environment material and to assure that they understand their responsibilities with regards to its implementation.

By training through certain activities, increase our employees' awareness on the environment protection.

To assure that the suppliers and the contractors who we deal with are aware of the environment factors and that they use all means to minimize their activities on the environment.

Communicate regularly with all parties involved with the environmental management of Metanor Resources Inc. and to take into consideration their suggestions and their concerns.

Ghislain Morin,  
President & COO

Pascal Hamelin,  
General Manager of Operations
